FORMER AMERICAN SHIPS WILL FIGURE

In the Naval Operations of the European War in the Balkan States.

(Correspondence of Associated Press.)
PARIS, Nov. 18.—American-built ships and American big guns will figure in the first line of any naval operations growing out of the Balkan conflict, as the former American battleships Idaho and Mississippi, now the Greek battleships Kilkis and Lemnos, are the best warships possessed by any of the Balkan states, while eight monster fourteen-inch guns built by the Bethlehem works for Greece are now doing service at the Dardanelles.

The Balkans have a long stretch of coast on the Mediterranean and Black seas, making naval operations likely on both these fronts. All the states have navies except Serbia.

Home Trading Creates a Greater Community Spirit

Intense farming is the kind of farming that makes it possible for a landowner to become wealthy from the products of a ten-acre plot, while his neighbor who owns five hundred acres, goes hungry. There are lessons in plenty to be learned from this intensive farming. A homely old saying one often hears in the country is, "I live at home and board at the same place." That is the farmer's way of expressing his independence.

Intensive cultivation of the resources and advantages of a small city will, in time, make it a very wealthy city. Of course, such a city will not remain small, but even if it does, it will be a great city. Gary, Ind., is not the largest city in the United States by many thousands, but its public schools have taught the world lessons in education. Monroe, La., is a small city, but it was the first city in the United States to have a municipally-owned and operated street railway.

The good farmer puts everything back into the soil that he can. He does not feed his hay or grain to his stock and then spend money for commercial fertilizer. Clarksburg is not a large city, that is, not yet, but intensive cultivation, applied to what the city has, can make it one of the most prosperous cities in the country.

The one big thing in making Clarksburg a city where hard times will never be known is to keep Clarksburg money in Clarksburg. This is a figure of speech which applies to the entire Clarksburg territory.

Chicago is a great metropolis. Stock yards, wholesale houses, and mail order business, built up with money from the South and West, and the East have made Chicago what it is. If the Clarksburg money which has gone into Chicago coffers could be got in a lump sum, it would be sufficient to guarantee comfortable livings for practically every person in the city, were the city twice as large as it is.

It is not logical, it is not patriotic, it is not sensible for money that is earned in Clarksburg and its territory to be sent to Chicago, St. Louis or New York, there to help build skyscraping buildings, and beautiful churches, and schools, and art galleries and theaters.

The common sense of the thing is to plant one's dollars in Clarksburg and its trade region. Every dollar invested in Clarksburg helps you and helps Clarksburg and its enterprises a dollar's worth—and then some. The moral effect of supporting Clarksburg's enterprises in incalculable in its general effect upon the community at large. Every dollar sent out of the city helps some other city and robs Clarksburg of what is its due. As a simple but fundamental economical proposition this "buy in Clarksburg" movement is very plain. If any one will stop a moment to consider how far one dollar spent in Clarksburg will go toward building up the city, he can hardly spend that dollar away from the city without knowing that he is hurting not only himself, but other business men.

So it behooves us to learn from the farmer. These times are called tight. What if they are? Can any one say the ten-acre farmer who lives at home and makes his little plot yield a comfortable living is less happy than his brother of the hundred and fifty-acre farm? Suppose Clarksburg does not grow with boom speed for the next few months—if the money earned here is spent here, there will be nothing to worry about, and when the flush times come, as they are bound to do, there will be one city ready to receive them.

"Buy in Clarksburg" teaches community spirit, and community spirit is the greatest factor in building cities. Des Moines, Ia., has been built largely on community spirit. It is a well-governed, prosperous city because a long time ago it learned to keep everything at home it could, and because it learned the simple lesson that a Des Moines dollar had, but one proper place—in Des Moines.

Here is our farm, waiting for the cultivation. Plant the dollar here, and the harvest will come in a surprising short time. "Buy in Clarksburg" spells prosperity for all—it means more jobs, bigger salaries, more homes and more money.

ships—among the largest ever produced—were under way at the Bethlehem works to be mounted on the Greek battleship Salamis, building at the Vulcan yards in Germany. But when Germany appropriated the great battleship the huge guns had not been delivered, and Germany preferred its own type of Krupp guns. Just then Greece was much interested in the approach of the Anglo-French force of the Dardanelles, just across the Aegean from Greece, and a transfer was quickly arranged by which the fourteen-inch guns were mounted on monitors forming a part of the Dardanelles expedition. There they are today, probably the most effective weapons in use.

Altogether Greece is the best equipped of the Balkan states to make a naval showing, and this chiefly through American ships and guns.

OIL AND GAS DEVELOPMENT OF TRI-STATE

Latest Reports of Operations in West Virginia, Pennsylvania and Ohio.

Interesting field developments are lacking in all districts. Few completions were reported from any section and they eat not better than light pumps. The Dorseyville field is the leading attraction, but the well that is attracting the most attention has not been drilled deep enough into the sand to get the good pay. The well is located on the Seibert farm and is owned by the Rushville Drilling Company. It is drilling at twenty-two feet in the sand and has found nothing but a light gas pressure in the top of the thirty-foot sand. So far as they have drilled into the sand the formation has been found regular, but very hard and drilling is slow. At between thirty-two and thirty-five feet, the depth at which it was found in the other wells, they expect to get the rich pay streak and it will probably be another day's drilling before it will be deep enough.

The American Natural Gas Company's No. 2 on the J. Haas farm is holding up at about 360 barrels a day. The National Oil and Gas Company's three producers on the W. J. Robinson farm are holding up very creditably. Alex Weyla's well on the McFarland farm is due to get the sand this week. New work is starting in all directions from production and interest in the development is increasing.

Only Light Gasser. In the Brush creek field, Allegheny county, Zortman and Company have completed a test on the John Holman farm and found nothing but a light gasser in the boulder. This company holds leases on 200 acres of the Duthill tract. In that section there is a chance for production in the 100-foot, 80-foot or the Snee sand and they will begin development work at once.

At the headwater of Dunkard creek, Jackson township, Greene county, the Manufacturers' Light and Heat Company has drilled its test on the H. C. Smith farm through all sands and to a depth of 3,330 feet and found nothing but a little gas in the Big Injun formation. In the same district the same company is drilling a test on the G. M. Chaney farm and the Carnegie Natural Gas Company is drilling a test on the James Davis farm.

The Lower Southwest. In the late completions in the West Virginia fields nothing better than light pumps and gasers have been found. On Devil Hole run, Grant district, Ritchie county, the C. L. Brown Oil Company completed No. 5 on the Rutherford Bros. farm and secured a five barrel pumper in the Keener sand. On Siah creek, Union district, the Carnegie Natural Gas Company drilled a test on the A. J. Wilson farm through the Big Injun sand and found it barren. The hole has been abandoned.

On Camp run, Grant district, the Hope Natural Gas Company completed and shot its test on the Riley Brown farm and developed a light show of oil

Makes Your Stuffed, Germ-Laden Catarrhal Head Clear as a Bell

When you wake in the morning plagued with the tortures of head colds and catarrh, head, nose and throat stopped up, air passages clogged with obnoxious catarrhal discharges that have collected during the night and you can hardly breathe—just put a little Hyomel Pocket Inhaler charged with the pleasant healing oil of Hyomel between your lips. Hold it there while dressing and breathe the medicated, antiseptic, germ-killing aid deep into your nose, throat and lungs with every breath you draw.

By the time you are dressed your head will be clear as a bell, you will breathe with ease and comfort, eat your breakfast with a relish and about your day's work with a clear brain and steady eye.

This clean smelling, germ destroying air of Hyomel penetrates deep down into every fold and crevice of the membranous linings of your nose, throat and lungs where no liquid spray could possibly get and absolutely kills and drives out of your system every germ it finds there, heals the inflamed swollen tissues and after the very first trial you notice a wonderful improvement. A few weeks' use and every catarrhal germ is killed and driven out of your system.

Druggists everywhere think so well of Hyomel that they agree to give you a guarantee with every complete inhaler set you purchase that if it does not satisfy you will gladly return every cent you paid for it, but if using for the first time be sure to ask for the complete Hyomel Pocket Inhaler outfit as the smaller package does not contain the inhaler. Wells-Haymaker Co., or most any other reliable druggist will gladly supply you on request.—Advertisement.

in the Mason sand. On the south fork of Hughes river, Murphy district, W. P. Reed and Company completed a second test on the R. F. Kerns farm and got a five barrel pumper in the salt sand. On Crab run, Murphy district, the Crab Run Oil and Gas Company, No. 8 on the D. M. Martin farm is good for three barrels a day in the salt sand.

On Sharp's run, Jefferson district, Pleasant county, William and Dinah Moore drilled their test on the Smith farm through the Squeam sand and secured a light pumper. In this test nothing was found in the upper sands. On Tannille creek, Tannille district, Harrison county, the Hope Natural Gas Company completed a test on the S. O. Stonestreet farm and has a gasser in the Big Injun sand. On Ann Moore run, Simpson district, the same company drilled a test on the Emanuel Benedum farm through the fifth sand and secured a fair gasser in that formation.

New Work in Clay County. In the Big Injun sand development on Birch run, Union district, Clay county, the Chalmers Oil and Gas Company's No. 7 on the J. P. Samples farm, completed a few days ago and coming in at the rate of 120 barrels a day, will stimulate development work in Clay county. During the last three years development work in that district has been conducted in a desultory way and the best completions not better than light pumps. The big well is located in fairly well defined territory, but is an inspiration for operators in Union district. The Chalmers Oil and Gas Company has the rig completed for No. 8 on the C. P. Samples farm.

Southeastern Ohio. In the southeastern Ohio fields there is no improvement in the productiveness of the late completions. In the Big Injun pool, near Columbiana in section 9, Fairfield township, Columbiana county, the Victoria Oil Company drilled No. 11 on the Frederick Theiss farm through the sand and secured a three or four barrel pumper. The location is inside of defined limits. Columbiana county has more new work starting than at any time in a number of years. In the northwest corner of section 30, Knox township, Kuhns and Phillips are drilling a test on the J. E. and J. C. Miller farm. In the southeast quarter of section 31, Anderson and Crissinger have the rig completed for a second test on the A. L. Johnson farm. In section 28 in the same township the Worth Oil Company has the rig completed for No. 3 on the D. F. Hahn farm, and in section 8, Fairfield township, the Victoria Oil Company has the rig completed for a second test on the Samples heirs' farm.

In Lawrence township, Washington county, J. W. Grey and Company drilled No. 26 on the J. D. Lehmer farm through the second Cow Run sand and have a very light pumper. In Washington, Nobels and Moran counties development work is increasing despite the fact that nothing better than very light pumps can be hoped for. In the deep sand territory in Starr township, Hocking county, several important tests are drilling in or near the top of the sand.

WEST VIRGINIA CLASHES WITH MARIETTA TEAM

On Parkersburg Gridiron Friday Afternoon and Fast Game is Expected.

The coming game with Marietta College at Parkersburg on Friday, proves that there is going to be some real sensational plays made by both teams, when the fast Ohio team battles with the sturdy mountaineers of West Virginia University.

The big state eleven showed conclusively it must be considered as one of the greatest of the country, when it decisively defeated the strong team from Virginia Polytechnic Institute by a score of 19-0, securing all of the points in the first half, and being content to save the men for the coming games with Marietta and Wesleyan. Another view can be gotten of the real strength of West Virginia when it will be remembered that Washington and Lee was conquered by State, and then this big team from Virginia almost defeated Cornell, probably the strongest team in college circles this year.

Followers of the powerful State eleven certainly are entitled to many optimistic views as to how West Virginia could have shown its skill against even such a formidable team as Cornell. Hite and Curry demonstrated to the delight of football fans at Saturday's contest some backfield work never before excelled by any state team in the history of the university. State rushed the ball for 332 yards during the game against an all-powerful line, and showed a

LADIES--

Just to give thanks to you for helping to make this Clarksburg's Leading Cloak and Suit Store, we are going to have a **SUIT SALE**, commencing tomorrow, Friday, November 19th, which will enable every lady to wear a new Suit for Thanksgiving, and save just exactly \$7.50 and \$10.00 on each Suit. No need now to wait until the

January Sale

All of our new up-to-the-minute Fur trimmed Suits that sold for \$20.00 and \$25.00, your unrestricted choice for Thanksgiving

\$12.50 to \$15.00

Colors brown, black, navy, light blue, grey and wisteria. Sizes from 14 to 46. Every woman in Clarksburg and vicinity knows when we use the word **SALE** it actually means dollars in her pocket.

smashing attack on end and tackle plays.

The passing was hindered somewhat by the wet condition of the field, nevertheless two long passes good for forty-five yards each struck terror into the hearts of Wesleyan and Marietta supporters who were carefully watching the playing of West Virginia prior to those coming games. The game with Marietta should be fast and furious from start to finish, as each team has considerable preference for the running attack and the aerial bombardment toward coveted goals. It is expected that Parkersburg will assemble thousands for the game.

WESLEYAN CLUB

Making Preparations to Attend West Virginia-Wesleyan Game at Fairmont.

The Wesleyan rosters club, which first came into existence for the Washington and Jefferson-Wesleyan contest here last week, will be in evidence again on Thanksgiving at Fairmont according to reports given out from headquarters. A bunch of tickets in the Wesleyan section of the field has been secured and these will be handled by private sale by C. O. Law at the offices of the Northwestern Life Insurance Company in the Goff building beginning today. It is likely, too, that a special street car will be chartered to carry the rosters over to Fairmont as fully seventy-five are expected to make the trip.

London's largest electric sign, recently erected, contains about 1,000 incandescent lamps. Wheat is profitably grown in Lower California.

TO WHOM IT MAY CONCERN: This is to notify the public that I will not be responsible for any debts contracted by my wife, Clara E. Miller, she having left my bed and board without just cause.
